***Reasons for Allowance***

1. Claims 1, 3-20, 22-40 are allowed. Claim 1 and 20 is allowed because of the added feature where the level of spatial granularity is chosen based on "the total quantity of data present in the signal, including precincts that overlap the region of interest and precincts that do not overlap the region of interest." The prior art of record does not base the determination of spatial granularity using a total quantity of data present in the signal, where the total quantity of data includes precincts that do not overlap the region of interest. The prior art of record is only applies when the total quantity of data contains only precincts that overlap the region of interest. Therefore claims 3-19 and 22-38 are allowable because they depend from these claims. Claims 39 and 40 put in independent form objected to claims 4 and 23 of the prior claim set. These claims are allowable for reasons set forth in the non-final rejection mailed 1/23/2007. Claim 39-40 contains allowable subject matter because no ratio of the quantity of data received vs data required is used for determining granularity is disclosed in any of the references cited by the examiner or found in the prior art.
